Fourth Edition

Spelling Power

An important book on liberating ourselves from the state of “waking sleep” in which we live our lives, as taught by one of the most influential spiritual teachers of the 20th century As the closest pupil of the charismatic spiritual master G. I. Gurdjieff (1866–1949), Jeanne de Salzmann was charged with carrying on his teachings of spiritual transformation. Known as the Fourth Way or “The Work,” Gurdjieff’s system was based on teachings of the East that he adapted for modern life in the West. Now, some twenty years after de Salzmann’s death, the notebooks that she filled with her insights over a forty-year period (and intended to publish) have been translated and edited by a small group of her family and followers.

The result is this long-awaited guide to Gurdjieff's teaching, describing the routes to be traveled and the landmarks encountered along the way.

Organized according to themes, the chapters touch on all the important concepts and practices of the Work, including: • Awakening from the sleep of identification with the ordinary level of being • Self-observation and self-remembering • Conscious effort and voluntary suffering • Understanding symbolic concepts like the Enneagram • The Gurdjieff Movements, bodily exercises that provide training in Presence and the awareness of subtle energies • The necessity of a "school," meaning the collective practice of the teaching in a group

Madame de Salzmann brings to the Work her own strong, direct language and personal journey in learning to live that knowledge of a higher level of being, which, she insists, "you have to see for yourself" on a level beyond theory and concept. De Salzmann consistently refused to discuss the teaching in terms of ideas, for this Fourth Way is to be experienced, not simply thought or believed.

The Lion Led the Way

Was there a meaningful stellar sign over Bethlehem? What did it look like to someone looking up at the night sky? Did wise men really come from the East seeking Israel's Messiah sometime after the birth of Jesus? The biblical account of the wise men and the star that announced the coming of the Messiah of Israel has inspired and puzzled people for two millennia. Important aspects of Babylonian astronomy seem to be involved in understanding the star's appearing. But in addition, *The Lion Led the Way* also explores the men and events from a profoundly Jewish perspective. The traditional

Jewish names of stars and planets, Jewish symbols, as well as Jewish dates, all seem to be keys to unlocking the mystery of the famous star. The star of Bethlehem was not the brightest of the heavenly lights, nor was it the most spectacular starry manifestation of all time. However, it was part of the most meaningful set of celestial events in human history. The God of Israel is surprising. His ways are not our ways; his thoughts are not our thoughts. The star gives us a concrete example of God's intervention in the universe. Book website: www.star-of-bethlehem.info

Words Their Way Level B Big Book 2005c

Whilst most teachers are skilled in providing opportunities for the progression of children's learning, it is often without fully understanding the theory behind it. With greater insight into what is currently known about the processes of learning

and about individual learning preferences, teachers are better equipped to provide effective experiences and situations which are more likely to lead to lasting attainment. Now fully updated, *Ways of Learning* seeks to provide an understanding of the ways in which learning takes place, which teachers can make use of in their planning and teaching, including:

- An overview of learning
- Behaviourism and the beginning of theory
- Cognitive and constructivist learning
- Multiple intelligences
- Learning styles
- Difficulties with learning
- The influence of neuro-psychology
- Relating theory to practice

The third edition of this book includes developments in areas covered in the first and second editions, as well as expanding on certain topics to bring about a wider perspective; most noticeably a newly updated and fully expanded chapter on the influence of neuro-educational research. The book also reflects changes in government policy and is closely related to new developments in practice. Written for trainee teachers, serving teachers, and others interested in learning for various reasons, *Ways of Learning* serves as a valuable introduction for students setting out on higher degree work who are in need of an introduction to the topic.
