DF-1 Protocol

forces disable outputs download request echo enable outputs enable PLC scanning enter download mode enter upload mode exit download/upload mode file read

DF-1 / DF1 protocol is an asynchronous byte-oriented protocol that is used to communicate with most Allen Bradley RS-232 interface modules. DF1 protocol consists of link layer and application layer formats. DF1 works over half duplex and full duplex modes of communication.

Nim (programming language)

syntax: echo "hello world" echo("hello world") "hello world".echo() "hello world".echo echo("hello", " world") "hello".echo("world") "hello".echo " world"

Nim is a general-purpose, multi-paradigm, statically typed, compiled high-level system programming language, designed and developed by a team around Andreas Rumpf. Nim is designed to be "efficient, expressive, and elegant", supporting metaprogramming, functional, message passing, procedural, and object-oriented programming styles by providing several features such as compile time code generation, algebraic data types, a foreign function interface (FFI) with C, C++, Objective-C, and JavaScript, and supporting compiling to those same languages as intermediate representations.

Secure copy protocol

timestamps). Clients can also request files or directories from a server (download). SCP runs over TCP port 22 by default. Like RCP, there is no RFC that

Secure copy protocol (SCP) is a means of securely transferring computer files between a local host and a remote host or between two remote hosts. It is based on the Secure Shell (SSH) protocol. "SCP" commonly refers to both the Secure Copy Protocol and the program itself.

Ping, however, only computes the final round-trip times from the destination point.

Created in 1989 by Brian Fox for the GNU Project, it is supported by the Free Software Foundation.

According to OpenSSH developers in April 2019, SCP is outdated, inflexible and not readily fixed; they recommend the use of more modern protocols like SFTP and rsync for file transfer. As of OpenSSH version 9.0, scp client therefore uses SFTP for file transfers by default instead of the legacy SCP/RCP protocol.

Echoes of Mana

Prior to release, Echoes of Mana reached one million pre-registrations. By September 2022, it had reached four million downloads worldwide. Speaking

Echoes of Mana was a 2022 action role-playing video game developed by Wright Flyer Studios and published by Square Enix for Android and iOS devices as a spin-off within the Mana series. Following the adventures of a warrior chosen by the Mana Tree to travel multiple worlds in pursuit of a great evil, the gameplay featured the protagonist exploring different worlds based on earlier Mana entries. The game was free-to-play, incorporating a

gacha-based system for characters and upgrades.

It is designed as a 100% free alternative for the Bourne shell, `sh`, and other proprietary Unix shells.

In development for three years, the game was intended as having both combat challenge and be easy to pick up. The characters were illustrated by Haccan, and the music co-composed by Tsuyoshi Sekito and Ryo Yamazaki. Echoes of Mana was announced in 2021 as part of the Mana series' 30th Anniversary celebrations....

Test (Unix)

test whether a file is nonexistent or empty, type: if test ! -s " \$1 " ; then echo \$1 does not exist or is empty. fi If the file specified by the first positional

test is a command-line utility found in Unix, Plan 9, and Unix-like operating systems that evaluates conditional expressions. test was turned into a shell builtin command in 1981 with UNIX System III and at the same time made available under the alternate name [.

Livescribe

translator available). Livescribe has made four versions of its smartpen: Pulse, Echo, Sky Wi-Fi (or Livescribe Wi-Fi), and Livescribe 3. The pens can store about

Livescribe is a paper-based computing platform that consists of a digital pen, digital paper, software applications, and developer tools.

Intel Play

com. Retrieved 2025-03-14. QX3 Support Page QX3 Download Finder: Drivers and Software Page QX3 Manual by Brian Ford QX3 Tutorials at Marly Cain's Amazing

The Intel Play product line, developed and jointly marketed by Intel and Mattel, was a product line of consumer "toy" electronic devices. The other toys were the Digital Movie Creator, the Computer Sound Morpher, and the Me2Cam. The line was launched in the fall of 1999.

Bash (short for "Bourne Again SHell") can operate within a terminal emulator, or text window, where users input commands to execute various tasks.

Jim Marggraff, inventor of the LeapFrog FLY Pentop computer and creator...

It also supports the execution of commands from files, known as shell scripts, facilitating automation.

For Internet Protocol Version 6 (IPv6), the tool sometimes has the name traceroute6 and tracert6.

Central to the Livescribe platform is the smartpen, a ballpoint pen with an embedded computer and digital audio recorder. When used with Anoto digital paper, it records what it writes for later uploading to a computer, and synchronizes those notes with any audio it has recorded. This allows users to replay portions of a recording by tapping on the notes they were taking at the time the recording was made. It is also possible to select which portion of a recording to replay by clicking on the relevant portion of a page on-screen, once it has been synced to the Livescribe Desktop software.

Traceroute

data download. If there are multiple mirrors available for the same resource, each mirror can be traced to find the fastest. The traceroute manual page

In computing, traceroute and tracert are diagnostic command-line interface commands for displaying possible routes (paths) and transit delays of packets across an Internet Protocol (IP) network.

The command reports the round-trip times of the packets received from each successive host (remote node) along the route to a destination. The sum of the mean times in each hop is a measure of the total time spent to establish the connection. The command aborts if all (usually three) sent packets are lost more than twice.

The Bash command syntax is a superset of the Bourne shell, `sh`, command syntax, from which all basic...

The Intel Play product line was discontinued on March 29, 2002, when it was purchased by Tim Hall's holding company Prime Entertainment. Hall founded Digital Blue, which continued the Intel Play product line under the Digital Blue brand. The "Play" logo of Intel Play became a staple of 2K Play in 2007.

Hauptwerk

configuration file that defines organ parameters, such as ranks, stops, manuals, coupling and organ images for display in Hauptwerk's user interface. The

Hauptwerk is a computer program from Milan Digital Audio that allows the playback or live performance of pipe organ music using MIDI and recorded sound samples.

Bash (Unix shell)

```
$ printf '%s\n' 'echo script_file: &quot;${@}&quot;'; &gt; ./echo $ chmod 0700 ./echo $ hash -r; type -a echo echo is a shell builtin echo is /usr/bin/echo echo is /home/liveuser/echo
```

In computing, Bash is an interactive command interpreter and programming language developed for Unix-like operating systems.

Bash has gained widespread adoption and is commonly used as the default login shell for numerous Linux distributions.
