

Financial Markets Institutions

Custom Edition

Global marketing is also a field of study in general business management that markets products, solutions, and services to customers locally, nationally, and internationally.

Financial District, Manhattan

major financial institutions, including the New York Stock Exchange and the Federal Reserve Bank of New York. Anchored on Wall Street in the Financial District

The Financial District of Lower Manhattan, also known as FiDi, is a neighborhood located on the southern tip of Manhattan in New York City. It is bounded by the West Side Highway on the west, Chambers Street and City Hall Park on the north, Brooklyn Bridge on the northeast, the East River to the southeast, and South Ferry and the Battery on the south.

a price at which the future transaction must take place, and

Global marketing

Historically, banks with retail locations signal the financial strength of their institutions. Retail locations for consumer brands add onto the evidence

Global marketing is defined as “marketing on a worldwide scale reconciling or taking global operational differences, similarities and opportunities to reach global objectives”.

The City of New York was created in the modern-day Financial District in 1624, and the neighborhood roughly overlaps with the boundaries of

the New Amsterdam settlement in the late 17th century. The district comprises the offices and headquarters of many of the city's major financial institutions, including the New York Stock Exchange and the Federal Reserve Bank of New York. Anchored on Wall Street in the Financial District, New York City has...

Derivatives can be used to insure against price movements (hedging), increase exposure to price movements for speculation...

a future act which must occur (such as a sale or purchase of the underlier),

Financial modeling

set of hypotheses about the behavior of markets or agents into numerical predictions. At the same time, "financial modeling" is a general term that means

Financial modeling is the task of building an abstract representation (a model) of a real world financial situation. This is a mathematical model designed to represent (a simplified version of) the performance of a financial asset or portfolio of a business, project, or any other investment.

Derivative (finance)

developed for the corporate debt markets, over time CDOs evolved to encompass the mortgage and mortgage-backed security (MBS) markets. Like other private-label

In finance, a derivative is a contract between a buyer and a seller. The derivative can take various forms, depending on the transaction, but every derivative has the following four elements:

Digital Markets Act

under the Digital Markets Act

European Commission";. digital-markets-act.ec.europa.eu. Retrieved 8 May 2024. "Commission closes market investigations on - The Digital Markets Act (DMA) is an EU regulation that aims to make the digital economy fairer and more contestable. The regulation entered into force on 1 November 2022 and became applicable, for the most part, on 2 May 2023.

Institutions are a principal object of study in social sciences such as political science, anthropology, economics, and sociology (the latter described by Émile Durkheim as the "science of institutions, their genesis and their functioning"). Primary or meta-institutions are institutions such as the family or money that are broad enough to encompass sets of related institutions. Institutions are also a central concern for law, the formal mechanism for...

an item (the "underlier") that can or must be bought or sold,

a future date by which the act (such as a purchase or sale) must take place.

Market (economics)

services are established. Markets facilitate trade and enable the distribution and allocation of resources in a society. Markets allow any tradeable item

In economics, a market is a composition of systems, institutions, procedures, social relations or infrastructures whereby parties engage in exchange. While parties may exchange goods and services by barter, most markets rely on sellers offering their goods or services (including labour power) to buyers in exchange for money. It can be said that a market is the process by which the value of goods and services are established. Markets facilitate trade and enable the distribution and allocation of resources in a society. Markets allow any tradeable item to be evaluated and priced. A market emerges more or less spontaneously or may be constructed deliberately by human interaction in order to enable the exchange of rights (cf. ownership) of services and goods. Markets generally supplant gift economies...

Typically, then, financial modeling is understood to mean an exercise in either asset pricing or corporate finance, of a quantitative nature. It is about translating a set of hypotheses about the behavior of markets or agents into numerical predictions. At the same time, "financial modeling" is a general term that means different things to different users; the reference usually relates either to accounting and corporate finance applications or to quantitative finance applications.

The DMA aims to ensure a higher degree of competition in European digital markets by preventing large companies from abusing their market power and by allowing new players to enter the market. This regulation targets the largest digital platforms operating in the European Union. They are also known as "gatekeepers" due to the "durable" market position in some digital sectors and because they also meet certain criteria related to the number of users, their turnovers, or capitalisation. Twenty-two services across six companies (deemed "gatekeepers") – Alphabet, Amazon,...

A derivative's value depends on the performance of the underlier, which can be a commodity (for example, corn or oil), a financial instrument (e.g. a stock or a bond), a price index, a currency, or an interest rate.

Sellers of private-equity investments sell not only their holdings in a fund but also their remaining unfunded commitments. The private-equity asset class is inherently illiquid and is designed for long-term investment by institutional investors, such as pension funds, sovereign wealth funds, insurance companies, endowments, and family offices for wealthy individuals...

Emerging market

standards. This includes markets that may become developed markets in the future or were in the past. The term "frontier market" is used for developing

An emerging market (or an emerging country or an emerging economy) is a market that has some characteristics of a developed market, but

does not fully meet its standards. This includes markets that may become developed markets in the future or were in the past. The term "frontier market" is used for developing countries with smaller, riskier, or more illiquid capital markets than "emerging". As of 2025, the economies of China and India are considered to be the largest emerging markets. According to The Economist, many people find the term outdated, but no new term has gained traction. Emerging market hedge fund capital reached a record new level in the first quarter of 2011 of \$121 billion. Emerging market economies' share of global PPP-adjusted GDP has risen from 27 percent in 1960 to around...

Museum of American Finance

American finance and financial history. It is an affiliate of the Smithsonian Institution. Until 2017 it was located in the Financial District in Manhattan

The Museum of American Finance is an independent public museum dedicated to preserving, exhibiting and teaching about American finance and financial history. It is an affiliate of the Smithsonian Institution. Until 2017 it was located in the Financial District in Manhattan, New York City, but in April 2025 it announced a relocation to Boston, Massachusetts.

Institution

and norms are all examples of institutions. Institutions vary in their level of formality and informality. Institutions are a principal object of study

An institution is a humanly devised structure of rules and norms that shape and constrain social behavior. All definitions of institutions generally entail that there is a level of persistence and continuity. Laws, rules, social conventions and norms are all examples of institutions. Institutions vary in their level of formality and informality.

Private-equity secondary market

of the addressable market representing all existing private equity assets in circulation. Many of the largest financial institutions (e.g.,

Deutsche Bank

In finance, the Private Equity Secondary Market (also often called Private Equity Secondaries or Secondaries) refers to the buying and selling of pre-existing investor commitments to private equity and other alternative investment funds or the underlying private equity assets (e.g., credit secondaries). Unlike public markets, private-equity interests lack an established trading exchange, making transfers more complex and labor-intensive.

International marketing is the application of marketing principles in more than one country, by companies overseas or across national borders. It is done through the export of a company's product into another location or entry through a joint venture with another firm within the country, or foreign direct investment into the country. International marketing is required for the development of the marketing mix for the country. International marketing...
